WELCOMING LITTLE BAGRODIANS WITH FULL ZEST AND ZEAL

Welcoming students promotes a sense of belonging, giving tiny tots social and emotional support that helps children settle in long run.

We want our kids to feel they are wanted and welcomed....

Welcomes are so important. This helps to set up a positive tone for the rest of the day, boosting their academic engagement and reducing disruptive behaviour. To promote this a selfie corner was arranged and welcome gifts were distributed.

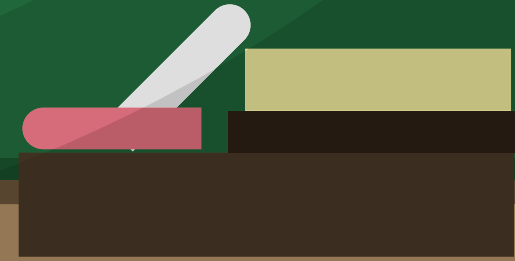

It is rightly said.

"They may forget what you said but they will not forget how you made them feel.

CO-CURRICULAR ACTIVITIES

Co-curricular activities like dance, gymnastics, computers, skating, casio etc. help in the holistic development of students and assist in developing critical skills and abilities to be successful and happy in 21st Century life. When theoretical curriculum and co-curricular activities are integrated together, then your chance of learning more and exploring more about your strengths, interests, and abilities becomes higher. Therein lies the importance of co-curricular activities which are supplementary to the theoretical curriculum.

Knowing Yourself

Palm printing with happy faces

Celebrating colours of life

Baisakhi Vibes

Earth Day

Playing time is a child's science lab

KNOWING YOURSELF

Introductions can be really fun and learning how to introduce themselves will help kids build their confidence, sense of identity and feeling of belonging to the community. Knowing self provides an interactive method for kids to learn all about themselves. Here are some glimpses of activities conducted in class to make this theme more interesting.

PALM PRINTING WITH HAPPY FACES

Painting is an effective way to build fine motor skills.

When children feel the cool, squishy texture of the paint and experiment with different colours and patterns, it encourages their creativity. It is also a good way to express emotions. Palm printing is an activity that little ones love to do as they play with different colours. Our preschoolers splattered their palm prints in their files and converted the palm printing by adding eyes, nose, mouth and a creative tie. Kids really enjoyed this activity.

COLOURS DAY CELEBRATION

Colours play an important role in the world which we live in. Colours can sway thinking, change actions and cause reactions. COLOURS COLOURS everywhere. They are a very important part of learning especially during Preschool days.

YELLOW COLOUR DAY CELEBRATION

BAISAKHI VIBES

"Harvesting all the fruits of hard work from the previous year."

Amidst the rich harvest, across the lush greenery, once again there were Baisakhi vibes in our school. Beautiful creative phulkari work was done on kite by our tiny tots as a group activity.

Phulkari is the folk embroidery of Punjab. People organize gatherings to fly kites to mark this auspicious occasion. This festival was celebrated in style and everyone enjoyed doing so.

EARTH DAY

Earth Day should encourage us to reflect on what we are doing to make our planet a more sustainable . This day started on a beautiful note with students and teachers engaged in different activities to promote Earth Day celebrations. This celebration becomes all the more relevant today, as our planet is facing ecological issues like climate change, water scarcity etc. While there are many activities children can do on Earth Day to improve the world, the biggest benefit Earth Day celebration can provide is education. If children implement what they learn on Earth Day in School then they can help the planet to become a cleaner place for generations to come.

PLAYING TIME IS A CHILD'S SCIENCE LAB. THE TIME TO CREATE, EXPERIMENT AND LEARN.

Children should be able to improve their ability to focus, to recollect information and think more critically as they grow. Cognitive skills allow children to understand the relationships between ideas, to grasp the process of cause and effect and to improve their analytical skills. We are here to provide our young children with a wide variety of learning opportunities, such as stringing beads, lacing holes, wooden puzzles, arranging colourful rings etc.

Fun filled activities

EARTH DAY

The greatest threat to our planet is the belief that someone else will save it. It was all about appreciating the uniqueness of our planet Earth, while at the same time, educating ourselves about what we have and what we are losing by acting in ways that aren't environment friendly.

This day also reminds us that we need to take action now - to protect our environment before its too late. The extensive celebration that was organised went a long way in introducing and orienting the young minds to develop a continuing compassion for Mother Earth.

Various activities were organised like adopting a plant, weaving a bird's nest, pledge taking, scavenger hunt, creative activities, etc.

Taking a pledge- Earth Day activity

BAISAKHI

The festival of harvest was celebrated to acquaint students with cultural heritage, however, unlike previous years because of the covid, it dampened the celebratory spirit of the festival.

Keeping the feel of the festival alive an assembly was organised which included dressing in traditional attire, performing folk dances, presenting a skit, etc. The dhol beats brought vibrancy to the environment.

PRACTICAL SKILLS- LET'S LEARN HANDWASHING

Hand washing is by far the best way to keep kids from getting sick and prevent the spread of germs.

When kids come in contact with germs, they can become infected just by touching their eyes, nose, or mouth. And once they're infected, it's usually just a matter of time before the whole family comes down with the same illness. An activity for teaching kids the proper way of washing the hands was done.

We should never underestimate the power of hand washing! The time you spend at the sink could save your trips to the doctor's clinic.

COLOURS DAY CELEBRATION

Can we imagine the world without colours? Not at all! Nature itself has many colours, which makes the world look beautiful. Colours are indeed the essence of nature. Colour plays an integral role in our world. Students were shown things related to the colour day. They brought food of the same colour & wore the same coloured dresses, too.

RED COLOUR- SIGNIFIES LOVE AND COMPASSION.

**YELLOW COLOUR -
ASSOCIATED WITH LAUGHTER, HOPE AND SUNSHINE.**

SOCIO EMOTIONAL DEVELOPMENT - LET'S LEARN TO EXPRESS OURSELVES

Children should know that it is perfectly fine to express what they feel. They should also be given ample opportunities to express their feelings. The best way to teach your children to express their feelings is to set a good example yourself. An activity was initiated by talking about our feelings and then describing how to best express those feelings. Different situations were given to the students and they were asked to respond to them accordingly.

PHYSICAL DEVELOPMENT

1. Walking is one of the cheapest way of getting around, being active and its beneficial for our planet, too. Lets be environment friendly – let's walk!
“Pattern walking was arranged for kids to help them to learn to make judgement, to understand what comes next, to make logical connections and to use reasoning skills.”
2. Patterns are found throughout the manmade and natural worlds and can be observed by all five senses. By learning to interpret animal tracks and footprints, students can uncover shapes and patterns in nature.

PRE NUMBER CONCEPTS

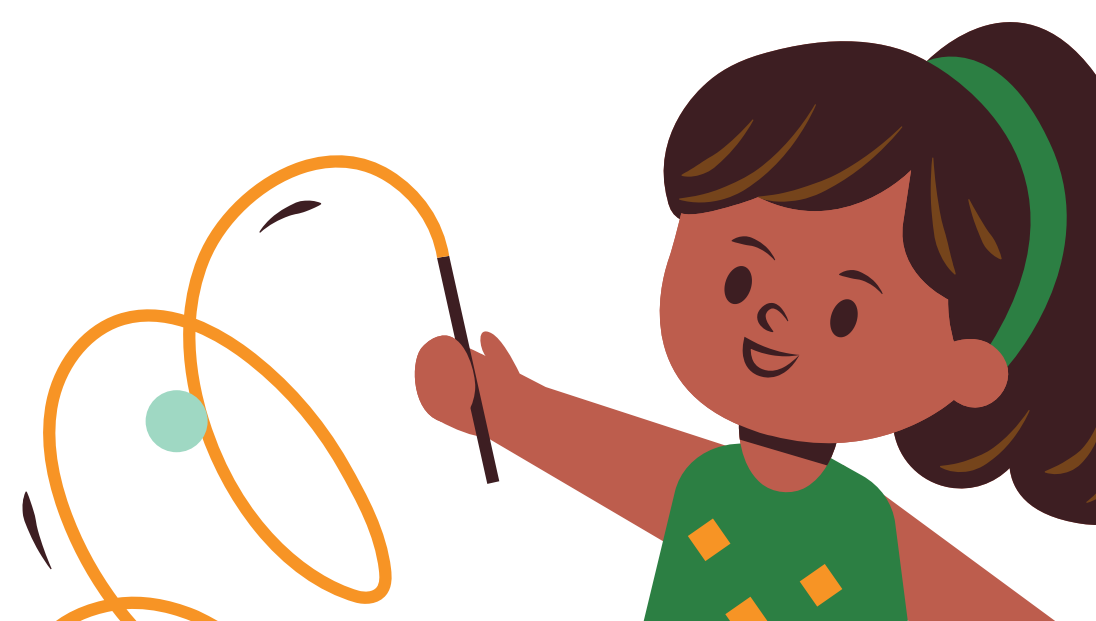

We don't directly let an infant eat solids without introducing semi-solid foods to them. Right? In the same way, we cannot expect a child to do basic maths without understanding the Pre number concepts. Pre number concepts in maths are very important for children to comprehend what maths is all about.

Corner display
(Pre- Number concept)

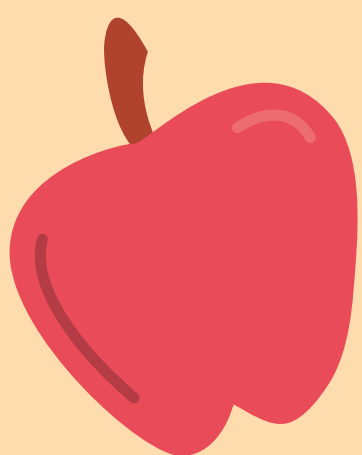

LETTER AND NUMBER ACTIVITIES

It is essential that kids are able to identify and understand numbers and letters from an early age. The best way to develop this knowledge is through a variety of fun, hands-on alphabet and numbers related activities. The same was done through multifarious activities.

COGNITIVE AND SCIENCE IS FUN - FOLLOW AND FIND

Mazes are loved by most of the kids & they provide a challenge for children that they enjoy thoroughly. Children needed to navigate the right path through the narrow passages to reach their goal.

CREATIVE ACTIVITIES

Creative activities help children to develop fine motor skills and create their own masterpieces. What's more, it's great fun! Various creative activities were done in class to enhance their creative skills.
