PEDAGOGICAL STRATEGIES FOR PRE-SCHOOLERS

The formative years of schooling set the tone for the rest of a child's educational path. As quoted by Albert Einstein "It is the supreme art of the teacher to awaken joy in creative expression & knowledge".

The following are some of the most effective teaching strategies for pre-school teachers.

1. **Promote early literacy** – Pre-school children develop literacy skills on a social environment through language rich activities e.g. – reading books, puppet shows, story narration sessions and various games related to recognition of letters their sounds and formations.
2. **Introduce numbers & mathematics** – Maths is required in everyday life. Simple activities can be inculcated to teach numbers, their formation and values. Concrete objects can be used to teach the concepts of addition & subtraction. Building blocks teach children about shapes & special relations (e.g. above, behind).
3. **Teaching science through observations** – Through observing, the children can better understand the world around them. Sensorial activities can be used to make children's observation skill sharper. Simple experiments can be done to tinkle their thinking caps like – mixing colours, concept of sink & float etc.
4. **Creativity and art** – Strategies that build a child's imagination & creativity can also help them learn colours & shapes as well as improve their fine motor skills. Creative processes such as drawing, singing or movement help children articulate experiences, express emotions & understand the cause & effect.

So, according to NEP 2020 curriculum & pedagogy in schools – learning should be holistic, integrated, enjoyable and engaging.

The beautiful thing about
LEARNING
is that no one can take it away
FROM YOU.
